

Basic Quilling Instructions

Loading the Slotted Quilling Tool - Hold your paper strip in your left hand. In your right hand, hold the tool at an angle to your paper and slide the tool onto the paper strip.

Quilling - With the tool at the top of the paper strip, start turning the tool with your right hand toward you, curling the strip onto the tool (keep the fingers of your left hand over the curling paper strip to keep it straight and at an even tension). When you finish curling the strip, let it go and then carefully remove the quilled item from the tool.

Tight Circle

Quill strip, glue closed while still on quilling tool. Remove from tool carefully.

Loose Circle

Place a tiny amount of glue onto the very end (tail) on the inside of the quilled item to close it.

Teardrop

Make a loose circle; then pinch to a point between your fingers, forming a teardrop.

Marquise

Make a loose circle; then pinch both ends to a point between your fingers, forming a marquise.

Broken Heart

Make a teardrop. On the end opposite of the point, push your fingernail inward to form the heart.

T-Scroll

Make a v-scroll and glue the inside legs together.

C-Scroll

Load your quilling tool and quill halfway down the strip. Remove tool and repeat the same to the other end, forming a c-scroll.

Heart Scroll

Same as a v-scroll except you are quilling inward.

V-Scroll

Load your quilling tool and quill halfway down the strip to the outside. Remove tool and turn the strip over. Continue to quill the other end, quilling outward.

S-Scroll

Load your quilling tool and quill halfway down the strip. Remove tool and turn the strip over. Continue to quill the other end, going in the opposite direction to form an s-scroll.
