

The Cab is made from a series of rectangles. From your stock of 1x you need to cut five pieces: the top is 7" x 8", the front is 7" x 6 1/2", the two sides are 7" x 6" and will have windows 4" x 3" cut into them, the bottom is 6" x 8". You will want to take the time to line the grain up: running front to back on the horizontal pieces and up and down on the vertical pieces.
