

1. Cut a piece of paper that is approximately five inches wide and long enough to wrap around the circumference of the bottle. Wrap the paper around the bottle, taping to secure in a ring shape.
2. Slip the paper ring off the bottle and mash it flat so the tape is off center. Make marks on one side of the paper that mimic the marks here.
3. Cut through both layers of paper to render a paper ring with one curved end and arched triangles cut in.
4. Slip the paper ring back onto the bottle with straight end on first, and the curved end near the bottom.
5. Transfer the markings onto the bottle by tracing around the bottom and inside the triangle cutouts.
